Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Remarks

1. The applicant amended the claims with subject matter indicated as allowable in the previous office action.
2. Upon closer inspection the examiner has determined that there are some 12 issues that have to be addressed before the case is allowed.
3. Claims 1-5,12,15-31,38 and 41-46 are cancelled.

Drawings

4. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the alert signal source of claim 32 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering

of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 6-32,38,39 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

7. Claims 6 and 32 recite " within a selected time interval having a duration Δt lying a range $0.01 \text{ sec} \leq \Delta t \leq 1 \text{ sec}$ ". Claims 13 and 39 recites "further comprising choosing said duration Δt for said selected time interval to lie in a range $0.05 \text{ sec} \leq \Delta t \leq 0.2 \text{ sec}$ ". The specification discloses on page 9, paragraph 0026 that the time interval durations for changing a location is $0.1 \text{ sec} \leq \Delta t_1 \leq 0.5 \text{ sec}$.

8. Claim 32 also recites "a system" and " an alert signal source". It is not clear to the examiner what reads on the alert signal source.

9. Claims 6-11,13,14,32-37,39,40 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps, such omission amounting

Art Unit: 2615

to a gap between the steps. See MPEP § 2172.01. Claims 6 and 32 recite a method and system of and for distinguishing an auditory alert signal from a background of one or more other auditory signals. The omitted steps are: how the alert signal is distinguished from other auditory signals by changing the location of the alert signal .
